DETAILED ACTION

1. Claims 1-6 have been examined.
2. Claims 1-6 have been allowed.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not expressly teach or render obvious the instant invention as recited in independent claims 1 and 5, and specific to the simulation for an industrial plant using a dependence matrix describing a component type specific signal flow structure for each component in combination with determining for each of the number of outputs which parameters cannot be derived from other parameters to be fed to the component and either entering only those parameters which cannot be derived from the other parameters to be fed to the component as recited in claims 1, or specifying a parameter input to be requested only for those parameters of each of the number of outputs which cannot be derived from other parameters to be fed to the component, as recited in claim 5. Dependent claims 2-4, and 6 are allowed as they depend upon an allowed independent claim.

Applicant's Preliminary Letter, dated 12/21/01, has been taken into consideration, in making the determination of allowability and with regard to enablement issues as raised in the parent case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
